-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2837

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jonokuchi as cited by applicant in view of Yaguchi et al.

Jonokuchi discloses load driver comprising an inverter driving a load, voltage converter executing voltage conversion between a power supply and inverter and control device controlling inverter to drive load, upon receiving command to perform a boosting operation by voltage converter, see fig 1 and col 2 lines 13-27 and claim 11. Jonokuchi lacks disclosing changing control mode from pwm to rectangular wave control mode. Yaguchi et al disclose changing from pwm to rectangular wave control mode, see paragraph 142-147. It would have been obvious to one of ordinary skill in the art to combine the load driver of Jonokuchi with changing control modes of Yaguchi et al for improved control.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Murai and Uchino disclose changing control modes.
